CHOOSE
YOUR

Skirting

Strong synthetic wood- choose your style!

Aqua Dream Spas offers a variety of polymer cabinet color options - designed to fit any decor. The cabinet also provides an attractive look, texture, and performance. The maintenance free cabinetry is extremely durable, moisture, and impact resistant- it doesn't crack, peel, or fade. Aqua Dream Spas custom rounded corners and removable panels allows for access to all the areas inside the spa.

- Acts as sound barrier
- Added protection against freezing
- The unique design protects equipment,
- Allows easy access for service and upgrading

LEARN
MORE
ABOUT THE

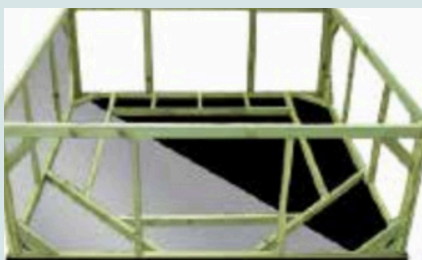

Structure

Reinforced Finish- reliable structure!

Vinyl ester resin falls between the polyester and epoxy resin when it comes to different characteristics and cost. It has a longer molecular chain than polyester resin which helps it absorb impact better than polyester and it shrinks less. There is also less chance of delamination when using VE resin. Vinyl ester can be used as a final coat after polyester resin to create a better water barrier.

Vinyl Ester resin is also more resistant to solvents and water degradation. It is typically used in Aqua Dream Spas.

Framing

QUALITY PRESSURE-TREATED WOOD STRUCTURE (50-YEAR LIFE EXPECTANCY, MEETS ENVIRONMENTAL STANDARDS). REMOVABLE SIDE PANELS. ANTI-MOISTURE ABS PLASTIC BASE FOR INCREASED STABILITY AND HEAT RETENTION. BASE AND FRAME WITH THERMOFOIL™ PROTECTION. FRAME IS BONDED TO SHELL.

Dynacrete Base

MADE OF RECYCLED ACRYLIC AND RESIN. ISOLATES FRAME BOTTOM FROM MOISTURE. THE STRUCTURE'S FLAT BASE PREVENTS THE CREATION OF AIR POCKETS, THUS ENSURING INCREASED STABILITY AND FOOT SUPPORT RIGIDITY. THE MOST DURABLE AND SOLID SPAS IN THE INDUSTRY.

Reinforced Finish

LUCITE® CAST ACRYLIC AND REINFORCED FIBERGLASS FINISH TO ENSURE STRENGTH AND DURABILITY. HAND ROLLED PROCESS ELIMINATES AIR POCKETS WHICH CAN CAUSE SEPERATION.

THE
IMPORTANCE
OF

Covers

Energy Efficient- Consistent Temperature

A good spa cover completely seals your hot tub or all-season pool, providing a stable and secure barrier between it and the surrounding environment. A few perks of using a cover: It locks the heat in so the water stays at a constant temperature, making it easy to take a dip at a moment's notice. It improves the energy efficiency of your spa and lowers your energy bill. It offers protection against the elements, including wind, rain, and the sun's UV rays. It keeps debris from falling into the water. A spa cover helps keep things in this desirable "ready to go" state while also keeping dirt, leaves, and critters from getting inside and creating a mess.

Double Sewn, Hand Grips Provide superior durability and an extra level of comfort.

Insulated Heat Bags Help to eliminate heat loss between the cover fold when spa is not in use.

4 Child Resistant Locking Mechanisms Fasten to each corner of the spa, providing that extra peace of mind.

Sealed Interior Hexene Poly Bag Protects inner foam core by reducing sweating and moisture.
